Additional

Disability certificate, moderate level

Experience

OLX, March 2024 - Now.

Senior iOS Developer.

Development, bug fixing, performance improvements of Search.

Centralny Ośrodek Informatyki, May 2023 - February 2024.

Senior iOS Developer. mObywatel iOS App. Mostly contributed to the user verification flow (Digital signing data).

Netguru, July 2019 - April 2023.

iOS Developer (07.2019), Senior iOS Developer (10.2021).

Development, recruitment, mentoring, promotion support, knowledge sharing, small teams leadership, code review support, complete SDLC in agile sprint-based environment.

Globallogic, July 2017 - April 2019.

iOS/Android Developer (Associate, Junior).

Participation in maintenance (bug-fixing, adjusting differences between platforms, unit tests, code refactoring for further maintenance) and development of new features.

Used to work with

1. iOS 16.0, SwiftUI, UIKit, Storyboards, XIBs, Programmatic UI.
2. Dependency management: Cocopods, Swift Package Manager, Carthage, XCFrameworks.
3. Testing: XCTest, Quick, Nimble, Snapshot Testing, TDD.
4. Networking: Alamofire, URLSession.
5. Threads: RxSwift, Combine, Async-Await.
6. Custom Tools: Macaw (vector graphics), Sorcery (code generation), Lottie.
7. Dependency injection: Swinject, Pointfree Dependencies.
8. App distribution: Firebase App Distribution, App Center, App Store Connect.
9. Continuous Integration: Bitrise, Fastlane, Code Signing, Danger, CodeClimate.
10. Firebase Stack: Auth, RemoteConfig, Analytics, Crashlytics, Firestore, Functions, Messaging, Realtime Database, App Distribution, Deep links.
11. Microsoft Stack: Microsoft App Center, MSAL, Sign In With Microsoft.
12. Certificate pinning, OWASP, JWT, OAuth, CommonCrypto.
13. Minor: Accessibility, OCR, VisionKit, HealthKit, LaunchDarkly.
14. Version control: Gitlab, Github, Stash.
15. MVC, VIPER, TCA, MVVM-C.

I agree to the processing of personal data provided in this document for realizing the recruitment process pursuant to the Personal Data Protection Act of 10 May 2018 (Journal of Laws 2018, item 1000) and in agreement with Regulation (EU) 2016/679 of the European Parliament and of the Council of 27 April 2016 on the protection of natural persons with regard to the processing of personal data and on the free movement of such data, and repealing Directive 95/46/EC (General Data Protection Regulation).

Roles and responsibilities

Supporting the development of security layer of the one of the most popular app in country:

- Implementation related to peer-to-peer authentication.
- Participation in defining POCs.
- Everything usual for iOS Development in agile environment.

Implemented from the very beginning complex app that supports thousands of shop franchisees in Poland as their main tool, including processing multiple financial data and communication with franchisor.

- Project setup from very the beginning.
- Preparation project to support multi developer cooperation, creation of scalable architecture for a long-term project.
- Setup of CI using Bitrise.
- Working with user stories.
- Initial setup for app test distribution using Microsoft AppCenter.
- Development of API Layer of the app.
- Development of custom designed views as charts, tables.
- Consulting in the pre-sales stage.
- Consulting UX/UI and security solutions.
- Adding graphs showing store revenue report on web and mobile applications. Implementation of data processing including normalization and mapping to custom representations.

Couple of fintech apps for very different markets: Europe, USA, Africa. Access to user's transactions, payments, and reports with all required safety measures and newest iOS frameworks.

- Tech decisions about usage of external APIs.
- Improving the security of the whole system.
- Creation tickets/tasks based on the client's user stories/initial designs.
- Preparation of the project to handover to another developer (due law reasons the project had to be easy to take over by other dev within couple days).
- Writing/gathering missing project documentation for further maintenance.
- Preparation to security audit.
- Removing usage of unnecessary APIs and refactor of legacy solutions.
- Participation with technology decisions.
- Improving performance.
- Priorities management based on the market and law requirements.
- Implementing new features, UI designs.
- Communication with customer's backend.
- Consulting changes in the app.
- Releasing the apps to the App Store.
- Leading the small iOS team by planning, scheduling and helping in implementing the whole project.
- Working with project requirements.

App for country-wide audience which replaces physical document and allows to connect with many public services for more than 1 million of users.

- Implementing new features.
- Implementing UI designs.
- Implementing analytics tools.
- Fixing complex bugs.
- Supporting the development of user-user verification

Async transmission to/from an external device via bluetooth with simultaneous communication with the backend for the automotive market for both platforms, iOS and Android.

- Integration with custom in-project library.
- Delivery of test builds of the app.
- Direct responding to customer issues and bug fixing.
- Implementing new UI designs or changing existing.
- Aligning differences between iOS and Android versions.
- Rewriting bad written components for further maintenance.
- Working with project requirements.
